

gyro:

WEB DEVELOPER JOB DESCRIPTION

The Web Developer will work with the account team, project manager and interactive designers to build standards-compliant, cross-browser compatible websites for clients. He or she will be responsible for front and back-end development as well as testing and debugging. He or she will also be responsible for modifying existing code to add new features/functionality.

Requirements/Qualifications:

- Minimum 4 years experience with hand-coded HTML, CSS & Javascript
- Experience with jQuery or other Javascript libraries
- Experience coding object-oriented PHP. ASP C# .NET a plus
- Experience designing database schemas using MySQL or other RDBMSs
- Experience deploying websites on WordPress and/or Drupal
- Excellent problem solving skills
- 4-year degree
- A link to your online portfolio so we can check out your code

Bonus points for the following:

- Experience with PHP frameworks (CodeIgniter, Symfony, Zend)
- Server management in LAMP environments
- Flash experience and knowledge of ActionScript 2 & 3
- Previous agency experience
